

## How to print a two-sided card:

1. Connect your computer to your printer (preferably color printer).
2. Open the card PDF and select File > Print.
3. Make sure to select “Actual Size” under Page Sizing and Handling.
4. Select Page 2 under pages to print.
5. Print Page 2 of this PDF (the cover page).
6. Open the paper drawer, and reinsert the printed page upside down. Follow steps 2-4 and print Page 3 (the inside page).
7. Fold in half.

Don't be ashamed if this takes a few tries!
